

ABSTRACT OF THE DISCLOSURE

JP B1

The object of the system according to the present invention is to relieve the user from the burden of printing and storing image data from a digital camera and to effectively utilize the image data. The system comprises a plurality of printing stations 100 with functions to read digital image data, to print the data by performing necessary image processing and to transmit or receive the image data, a management system 130 connected to each printing station via a network 120 and used for identifying management data of each printing station and for distributing necessary data to each printing station, and a server 131 for turning the image data (being transmitted from each printing station to the management system) to database and to store the data.
